Odoo. Instalación y configuración

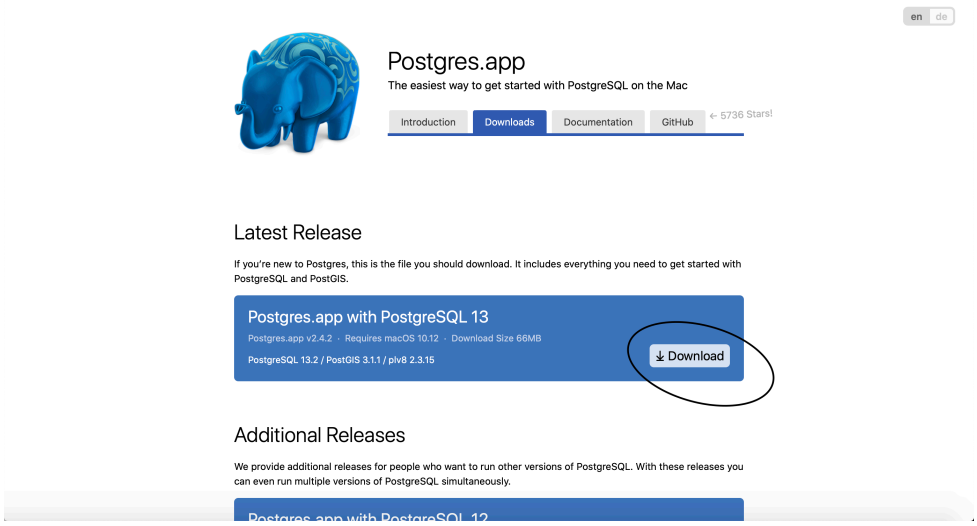
1. Creación de la carpeta Odoo y realizar un git clone del repositorio Odoo

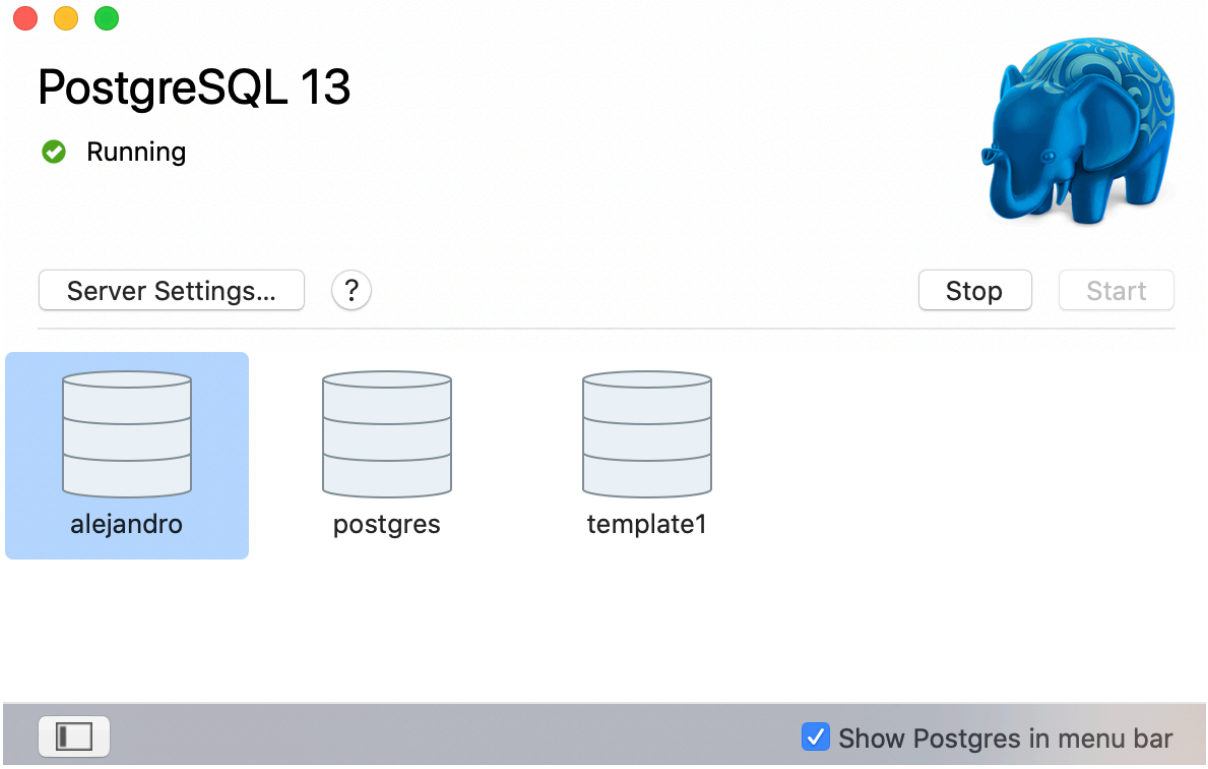
```
-zsh                                                    ⌥⌘1
alejandro@MacBook-Pro-de-Alejandro ~ % mkdir odoo
alejandro@MacBook-Pro-de-Alejandro ~ % cd odoo
alejandro@MacBook-Pro-de-Alejandro odoo % git clone https://github.com/odoo/odoo
.git
Cloning into 'odoo'...
remote: Enumerating objects: 2949216, done.
remote: Counting objects: 100% (249/249), done.
remote: Compressing objects: 100% (196/196), done.
remote: Total 2949216 (delta 138), reused 89 (delta 53), pack-reused 2948967
Receiving objects: 100% (2949216/2949216), 3.36 GiB | 1.61 MiB/s, done.
Resolving deltas: 100% (2455283/2455283), done.
Checking out files: 100% (27360/27360), done.
alejandro@MacBook-Pro-de-Alejandro odoo %
```

2. Comprobar el contenido de la carpeta Odoo

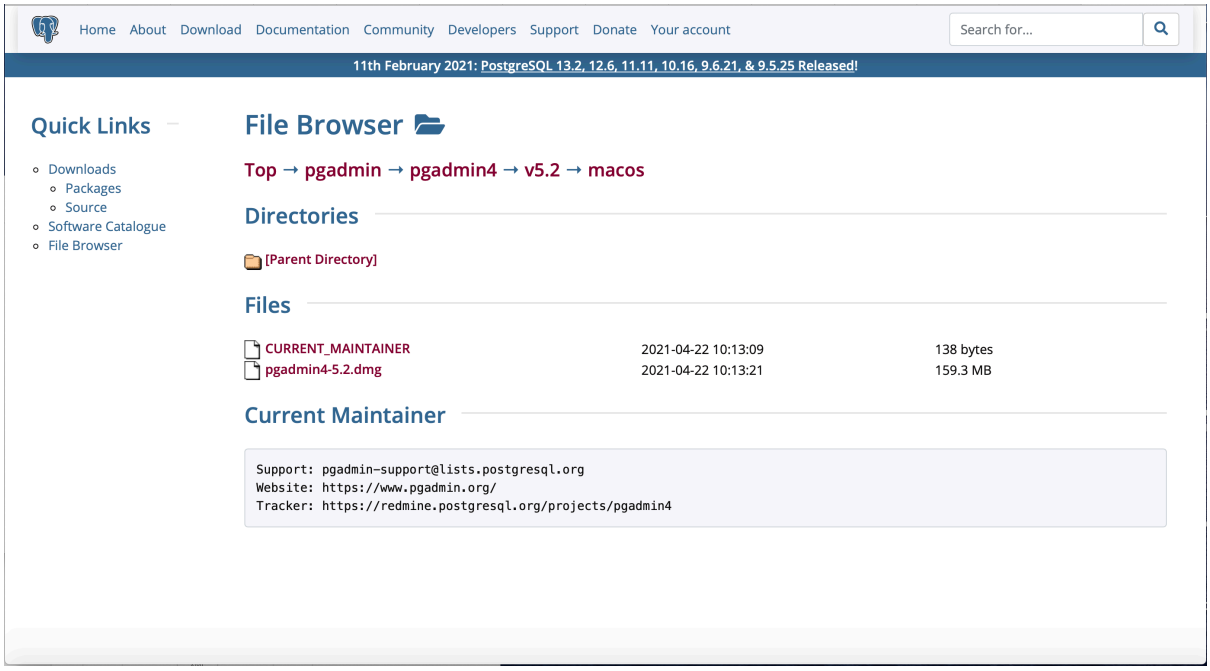
```
-zsh                                                                    ⌥⌘1
alejandro@MacBook-Pro-de-Alejandro odoo % cd odoo
alejandro@MacBook-Pro-de-Alejandro odoo % cd ./odoo
alejandro@MacBook-Pro-de-Alejandro odoo % ls
__init__.py     conf            import_xml.rng  netsvc.py       sql_db.py
addons          exceptions.py   loglevels.py    osv             tests
api.py          fields.py       models.py       release.py      tools
cli             http.py         modules         service         upgrade
alejandro@MacBook-Pro-de-Alejandro odoo %
```

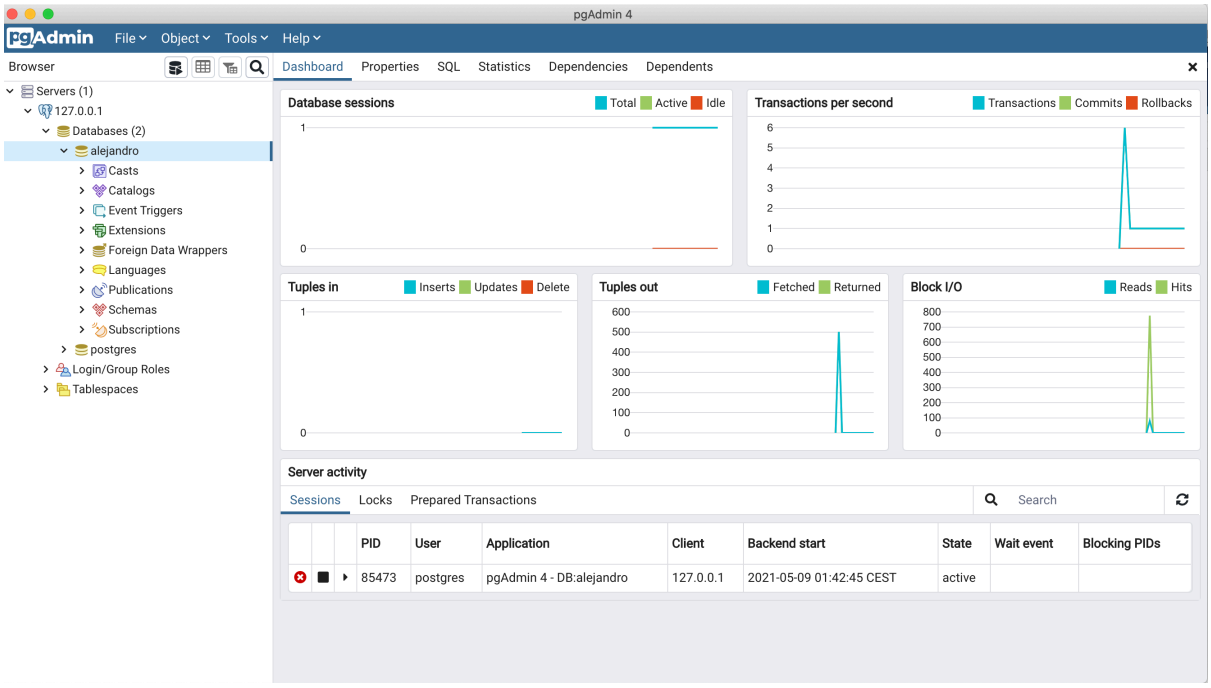
3. Descargamos e instalamos Postgres.app





4. Descargamos e instalamos PGAdmin.





Configuramos el puerto 127.0.0.1
